

## International Component Manufacturing & Design Show

— One stop solution provider for R & D, design and manufacturing of medical devices by covering the upstream industry

International Component Manufacturing & Design Show (ICMD), is specially designed for the business of medical device manufacturers and upstream product suppliers, which include Materials, Design, R&D, Components, parts, modules, software, data processing, Manufacturing equipment, OEM technology, packaging, printing, Cleaning, disinfecting and other relative services. In the spring of 2019, ICMD will collocated with CMEF in shanghai.

### Join the leading industry players

- Materials
- Design, research and development
- Components, parts and modules
- Software and data processing
- Manufacturing equipment and OEM technology
- Packaging and printing
- Cleaning and disinfecting
- Relative services

### Highlight of ICMD

- Nearly **20,000** square meters.
- Over 900 booths, more than **500** exhibitors participate in ICMD.
- Meet with more than **3,000** medical device manufacturers who exhibit with us at the CMEF
- Communicate with more than **24,000** decision makers engaged in medical device manufacturing, R&D, technology and sales.
- Get to know the most up-to-date trends of the medical device industry.
- Source for new products and new technology.

### Simultaneous event

#### Spring:

CMEF--Asia Pacific's leading event serving the entire value chain for the medical devices market

### Market Potential:

- 15,348 medical device manufacturing enterprises in China
- Number of medical device manufactures: Over 15,000
- 20 billion CNY on New product R & D expenditures

## Customized Medical Equipment Manufacturing Technological Innovation Forum

Along with ICMD, 'Customized Medical Equipment Manufacturing Technological Innovation Forum' focuses on the new technology of medical device design and manufacturing industry, intends to provide not only a convenient channel of communication between the enterprises and OEM suppliers, but also stimulate the innovation and the development of medical equipment manufacturing industry.

The previous forum covered the relevant content of medical device manufacturing industry, including biological materials, electronic components, technological research and development and other innovative technology. There were more than **300** participants including the famous experts of the industry attended the forum and there were also a series of speeches by world-famous OEM suppliers, which showed the cutting-edge manufacturing technology to medical equipment suppliers.
